Kalingasoft

Kalingasoft's deep understanding of education domain is reflected in its end-to-end solutions, offered for increasing operational efficiency of educational institutes. The company has an in-house developed state-of-the-art ERP package, which is an outcome of association with more than 100 institutes and involvement of more than 300 person years. The solution addresses all technical and procedural requirements of education institutes.

Through the recently started education-consulting practice, Kalingasoft is helping its clients in setting up and managing all aspects of educational institutes.

At this point of time, Kalingasoft is looking ahead to scale up its team to meet the demands of the growth path that it has charted for itself. Kalingasoft's e-learning practice works in association with national and international partners to reach new heights in this domain.

As they
say...

Greycells has the promise to help us scale up by creating a framework that will help us seamlessly manage our multiple campuses and tens of thousands of students. We are happy to have benefited from e-IMS for the past 4 years and expect Greycells will help us catapult to the next level.

Mr. Prashant Kumar, Director, NSHM, Durgapur.

Kalingasoft's product is scalable, highly secure, easy to deploy, and extremely user-friendly. The ease with which all the modules of Greycells interact with each other to give efficient and productive output is praiseworthy.

Mr. Ambikesh Shukla, Chairman Technology,
Doon School

For us, admission time was the most hectic time of year with numerous files floating from one table to another. Everything was based on efficiency of clerical team. But with Greycells everything has improved, it streamlines the working of the institute and provides framework to prepare important and relevant reports.

Mr. Rajan Hazarika (Admission Incharge)
Gauhati University

This product is so generic, that it was easily configured to our very specific admission process. All the processes - pre-application, application, and admission are automated by this. Thank You, Kalingasoft..

Prof. B. Majhi, HOD Comp. Science, NIT, Rourkela

As a student this product helped me prepare ahead for a class with easy access to the time table. Online publishing of marks helped me file my academic records easily and promptly with the bank regarding my education loan.

Mr. Roshan Routray, Student, KIIT
